-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, it is not fully understood what is meant by “so that there is a clear separation between the second finger and a third finger” in the context of the claims. Exactly what structure constitutes a clear separation?

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Leger, US Patent 2,421,339. A handle that is equipped on a hand tool providing a

secure grip and facilitating reduced stress on a user's hand, comprising a recessed surface area 13 on a side of the handle for receiving a thumb, a ridged surface area on a side opposing the recessed surface area, the ridged surface area providing at least a ridge 11 that provides support for securing a finger, wherein both the recessed surface area and the ridged surface area are located at a distal end of the handle. The handle has a slight curvature that is convex as viewed from a top side of the handle (see figure 3). The handle has a slight curvature that compliments the curvature of the palm of a hand. The ridged surface area comprises at least a pair of ridges, a first ridge separating a first recessed area 8 for receiving a first finger and a second recessed area 9 for receiving a second finger, and a second ridge separating the second recessed area from the remaining portion of the handle. As best understood, the second ridge protrudes out from the side of the handle significantly so that there is a clear separation between the second finger and a third finger (the smaller ridge following ridge 11), wherein the second ridge adequately supports the forces of both the second finger and the third finger during use of the hand tool. The recessed surface area for receiving the thumb receives the thumb as the thumb is aligned substantially parallel to the long axis of the handle.
